

3 Things You Need To Know

Imagine - you are found lying on the ground somewhere unconscious, or in a car crash, have a heart attack, an ambulance is called, the paramedic doesn't know if you are on medication, if you have any medical conditions, or your name? You may have a complex medical condition, life-threatening allergy to peanuts, be a Diabetic, Stroke Victim or on Blood Thinners etc A quick scan of your NFC MediScan Tag or wristband with a smart phone with NFC (**most smart phones have this option**) and a lot of those questions can be answered. They can then act quickly to protect and perhaps save your life.

Prices are NZD
